Design Pathway

Get started with this easy-to-navigate collection of videos, documentation, and tools to build great apps and games.

Learn the building blocks

Design is where everything starts. It's not just how people view your product, but how they interact with it. Design drives people's experiences, impressions, and feelings about how we process information, make decisions, and interact with technology.

Start your design path by peeking behind the curtain of Apple's design process. Watch sessions from Apple designers and evangelists. You'll find out how the design team gets the developer community get inspired, learn how to create welcoming, intuitive experiences, and find ways to simplify your navigation without compromise.

The qualities of great design

Essential design principles

Design foundations from idea to interface

Interface with the HIG

When you're ready to dive deeper into design, the [Human Interface Guidelines \(HIG\)](#) will be your best friend. The HIG is the home for guidance and best practices for Apple platforms, a comprehensive resource that you'll rely on from first sketch to final pixel. We'll be honest: It's pretty big. But we encourage you to get started by exploring these introductory pages. From there, you can gradually begin to branch out and see where your work takes you.

Getting started

Begin work on an app or game that feels at home on every platform you support.
